

# Jean-Luc Picard

Jean-Luc Picard was born in the countryside of France as the son of Maurice and Yvette Picard. He had one brother and a nephew, who both died in a fire. As a young boy he already aspired to join Starfleet Academy. He started his career as a scientist (with a great interest in archaeology), but switched to a command position later. He is most notably known for his position as captain of the USS Enterprise, the flagship of Starfleet. His ship was the first the encounter species like the Q and the Borg. Even though the main purpose of the Enterprise was exploration, Picard has found himself in war situations many times. He is known to be an excellent diplomat and strategist, who knows when to listen to his crew and delegate tasks. Time travel has allowed him to meet other icons of history like Zephram Cochrane and James T. Kirk.

## Metadata
